New Executive Order: "Stay Home, Stay Healthy, Stay Connected"

"Stay Home, Stay Healthy, Stay Connected" – that's what the state is asking of fellow Arizonans in the continued effort to slow the spread of COVID-19.

The latest Executive Order issued today by Governor Doug Ducey follows new guidance from the Centers for Disease Control and Prevention (CDC) and comes on the heels of a number of public health officials who are tracking data specific to Arizona. The Governor's EO calls on Arizona to keep physical distancing, while encouraging social connectedness among citizens. It takes place at 5:00 p.m. tomorrow, Mar 31, 2020.

"Keeping all Arizona's safe and healthy as we slow the spread of COVID-19 remains our top priority," said Governor Ducey. "Today's Executive Order is consistent with the guidance from the CDC and our public health officials, and it will help protect public health by minimizing Arizonans to maintain healthy habits and find alternative ways to stay connected with friends and loved ones while spending time at home. Slowing the spread of COVID-19 will ease new health capacity in our hospitals and healthcare facilities, and it will ease the burden on our healthcare workers. We are also working to ease the burden on drive-thru grocery stores. People should continue to buy what you need for a week's worth of groceries. I'm grateful to everyone making adjustments to fight this virus and protect others. Arizona will get through this, and we'll do it together."

Under the Executive Order, Arizona shall limit their time away from their place of residence or property, except:

- To conduct or participate in essential activities; and/or;
- For employment, to conduct or participate in essential functions; or
- To utilize any services or products provided by essential business services;
- And for employment if a sole proprietor or family owned business, and to conduct in a separate office space from your home and the business is not open to serve the public.

On March 23, Governor Ducey issued a Executive Order clarifying businesses and operations deemed "essential" and providing certainty to business owners, employees and families.

Under this order, Arizonans are also encouraged to improve social connectedness by:

- Maintaining ongoing connections and communication with current social supports and structures such as family, friends, neighbors and other social groups;
- Educating fellow Arizonans the negative health impacts of social isolation;
- Using technology to maintain social connections such as video conferencing, virtual social gatherings, assisting neighbors, implementing or participating in communication campaigns for at-risk populations, and peer to peer volunteer activities;

Under this policy, essential activities include:

- Obtaining necessary supplies and services for family, household members and pets, such as groceries, food and supplies for household consumption and use, supplies and equipment needed to work from home, assignments for completion of distance learning and products necessary to maintain safety, sanitation and essential maintenance of the home or residence;
- Engaging in activities essential for health and safety, including things such as seeking medical, behavioral health or emergency services and obtaining medical supplies or medication;
- Caring for a family member, friend, or pet in another household or residence, which includes but is not limited to transportation for essential health and safety activities and to obtain necessary supplies and services for the other household or residence;
- Engaging in outdoor exercise activities, such as walking, hiking, running, biking or golfing, but only if appropriate physical distancing practices are used;
- Attending religious services conducted in accordance which includes but is not limited to transporting children to child care services for attending such an essential service;
- Engaging in constitutionally protected activities such as speech and religion, the democratic process to include voting and legal or court proceeds provided that such is conducted in a manner that provides appropriate physical distancing to the extent feasible.

Already, Arizona has taken proactive steps to slow the spread of COVID-19.

On March 11, Governor Ducey issued a declaration of a Public Health State of Emergency to prepare for, prevent, respond to, and mitigate the spread of the disease.

On March 13, a statewide school closure was issued in coordination with Superintendent of Public Instruction Kathy Hoffman. Today, it was extended through the rest of the school year, following CDC guidance.

Many businesses have already greatly reduced their hours and operations as directed by health officials and in an effort to protect the public health and slow the spread of COVID-19.

On March 17th, following updated guidance from the CDC, the Arizona Department of Health Services (ADHS) issued updated guidance that includes restricting or preventing gatherings of 10 or more people, recommending telework and other alternatives, restricting access to nursing homes, retirement homes and long-term care facilities to provide critical services, and providing recommendations to businesses and dining establishments to mitigate the risk of COVID-19 transmission.

On March 19th, Governor Ducey required restaurants in Arizona counties with confirmed COVID-19 cases to provide drive-up or delivery only and required theaters, gyms and movie theaters in those counties to close. That same day, Governor Ducey issued a Executive Order to provide up to $5 million from Gov. Ducey's emergency fund to provide resources and services to Arizona's most vulnerable and provide for continued offering said services.

View a full list of actions HERE.

Last week, Governor Ducey launched the Arizona Together initiative to support Arizonans during the COVID-19 outbreak. Arizona Together is a statewide effort to connect Arizonans with information about resources, volunteer opportunities, and other opportunities. The website, ArizonaTogether.org, also features tools for mental health support for individuals and families facing changes and stress as a result of COVID-19.

New Executive Order: "Stay Home, Stay Healthy, Stay Connected"

"Stay Home, Stay Healthy, Stay connected" – that's what the state is asking of fellow Arizonans in the continued effort to slow the spread of COVID-19.

The latest Executive Order issued today by Governor Doug Ducey follows new guidance from the Centers for Disease Control and Prevention (CDC) and comes on the heels of a number of public health officials who are tracking data specific to Arizona. The Governor's EO Covid-19 aims to ensure physical distancing, while encouraging social connectedness among citizens. It takes place at 5:00 p.m. on tomorrow, Mar 31, 2020.

"Keeping all Arizona's safe and healthy as we slow the spread of COVID-19 remains our top priority," said Governor Ducey. "Today's Executive Order ensures that we can continue to slow the spread of COVID-19 while allowing Arizonans to protect public health by minimizing fluctuations in vulnerable healthy habits and find alternative ways to stay connected with friends and loved ones while spending time at home. Slowing the spread of COVID-19 will ease new health capacity in our hospitals and ensure that our healthcare workers have the resources they need to care for those who need it most. Arizona's strong and diverse economy rooted in the state's ability to keep people and businesses moving, and we are working to ease the burden on our economy. People should continue to buy what you need for a week's worth of groceries. I'm grateful to everyone making adjustments to fight this virus and protect others. Arizona will get through this, and we'll do it together."

Under the Executive Order, Arizona shall limit their time away from their place of residence or property, except:

- To conduct or participate in essential activities; and/or;
- For employment, to volunteer or participate in essential functions; or
- To utilize any services or products provided by essential business services;
- And for employment if a sole proprietor or family owned business, and to conduct it in a separate office space from your home and the business is not open to serve the public.

On March 23, Governor Ducey issued a Executive Order clarifying businesses and operations deemed "essential" and providing certainty to business owners, employees and families.

Under this order, Arizonans are also encouraged to improve social connectedness by:

- Maintaining ongoing connections and communication with current social supports and structures such as family, friends, neighbors and other social groups;
- Educating fellows to minimize the negative health impacts of social isolation;
- Using technology to maintain connections, such as telemedicine, virtual worship, virtual social gatherings, assisting neighbors, implementing or participating in communication campaigns for at-risk populations, and performing in volunteer activities;

Under this policy, essential activities include:

- Obtaining necessary supplies and services for family, household members and pets, such as groceries, food and supplies for household consumption and use, supplies and equipment needed to work from home, assignments for completion of distance learning and products necessary to maintain safety, sanitation and essential maintenance of the home or residence;
- Engaging in activities essential for health and safety, including things such as seeking medical, behavioral health or emergency services and obtaining medical supplies or medication;
- Caring for a family member, friend, or pet in another household or residence, which includes but is not limited to transportation for essential health and safety activities and to obtain necessary supplies and services for the other household or residence;
- Engaging in outdoor exercise activities, such as walking, hiking, running, biking or golfing, but only if appropriate physical distancing practices are used;
- Attending religious services conducted in venues which includes but is not limited to conducting religious services to attendees and to or in essential services;
- Engaging in constitutionally protected activities such as speech and religion, the democratic process to include voting and legal or court proceeds provided that such is conducted in a manner that provides appropriate physical distancing to the extent feasible.

Already, Arizona has taken proactive steps to slow the spread of COVID-19.

On March 11, Governor Ducey issued a declaration of a Public Health State of Emergency to prepare for, prevent, respond to, and mitigate the spread of the disease.

On March 15, a statewide school closure was issued in coordination with Superintendent of Public Instruction Kathy Hoffman. Today, it was extended through the rest of the school year, following CDC guidance.

Many businesses have already greatly reduced their hours and operations as directed by health officials and in an effort to protect the public health and slow the spread of COVID-19.

On March 17th, following updated guidance from the CDC, the Arizona Department of Health Services (ADHS) issued updated guidance that includes restricting or preventing gatherings of 10 or more people, recommending telework and other alternatives, restricting access to nursing homes, retirement homes and long-term care facilities to provide critical assistance, and providing recommendations to restaurants and dining establishments to mitigate the risk of COVID-19 transmission.

On March 19th, Governor Ducey required restaurants in Arizona counties with confirmed COVID-19 cases to provide drive-up or delivery only and required theaters, gyms and movie theaters in those counties to close. That same day, Governor Ducey issued a Executive Order to ensure that Arizonans have access to medical resources and to ensure the capacity for hospitals and providers to continue offering vital services.
